

A large, stylized, light gray letter 'R' is the central focus of the page. It has a thick, blocky appearance with a slight shadow effect, giving it a three-dimensional feel. The letter is set against a background of soft, radial light gradients that emanate from behind it, creating a glowing effect. The overall color palette is monochromatic, consisting of various shades of gray and white.

ROSTAING®

2022 CATALOGUE

NEW PRODUCTS FOR 2022

SARMENT

This product is specially designed for orchard and vineyard pruning and has an ergonomic reinforcement to withstand wood backlash. The glove was developed through **collaboration with 3 different vineyards**.

RESCUEPRO

Bolstered by its recognised search and rescue road-vehicle extrication market, these are the gloves with the highest mechanical and impact strengths for the Construction sector!

STRONGER

A model created using user tests in the timber sector which is ideally suited to all outdoor abrasive and cutting works.

LISON

The latest in the ZAMIS range: Lison is the butterfly that provides a version that shines and flaps its wings to light up children's eyes.

COCOON

A recycled polyester leisure glove that can be used as a work under-glove. Cold is one of the main reasons for wearing gloves, even more so when it is soft!

JEAN

The 1st 100% over recycled gloves (materials, finishes and packaging) manufactured in our Villieu workshops in France. Its name? Jean, as a reminder of the material that resulted in our working with 1083, but also a nod to the "Rostaing" founder, M. Jean Rostaing!".

WORK

For leather lovers, gloves with 4 uses for your gardening work.

GRIFSTOP

The latest in our scrub clearance product range. Added to the glove and the apron, these cuffs will complete user protection from scratches.

PLANT

Gloves that combine comfort, dexterity and repel water for your everyday maintenance work, that are also touch compatible!

GREENTACTILTOUCH

A new green, and touch screen compatible version of our BLACKTACTIL best seller.

R

STANDARDS COVERING PROTECTIVE GLOVES

EN ISO 21420:
General requirements for protective gloves.

Published in April 2020

This is the reference standard that defines the general requirements and test methods covering the design and construction of the glove, its harmlessness and the markings and information provided by the manufacturer which are applicable to all protective gloves.

EN16350

EN 16350:
Electrostatic properties.

This standard provides the additional requirements for protective gloves that are worn in an environment which includes, or is likely to include, flammable or explosive zones. It therefore indicates the test methods and requirements applicable to electrostatic dissipation gloves to reduce explosion risks to a minimum. Besides the vertical resistance which must be lower than $1.0 \times 10^8 \Omega$, the standard also defines design requirements. Electrostatic dissipation gloves are only effective if the wearer is connected to the earth by a resistance of less than $10^8 \Omega$.

EN 388:
Protective gloves for mechanical risks.
Published in 2016 with an A1 amendment in 2018

The standard defines the requirements, test methods, markings and information to provide concerning gloves for mechanical abrasion, cutting, perforation and eventually shock risk protection.

- A:** Abrasion resistance (4 levels: 1 to 4).
- B:** Cutting resistance (5 levels: 1 to 5).
- C:** Tear resistance (4 levels: 1 to 4).
- D:** Perforation resistance (4 levels: 1 to 4).
- E:** Cutting resistance as per ISO 13997 (6 levels: A to F).
- F:** Shock protection (optional test for 1 level identified by the letter P if the ≤ 7 kN requirement is met).

EN 407:
Protective gloves and other hand equipment for heat risks (heat and/or fire).
Published in April 2020

- A:** Limited flame propagation (on 4 levels: 1 to 4).
- B:** Contact heat resistance (4 levels: 1 to 4).
- C:** Convective heat resistance (4 levels: 1 to 4).
- D:** Radiant heat resistance (4 levels: 1 to 4).
- E:** Resistance to minor molten metal spray (4 levels: 1 to 4).
- F:** Resistance to major molten metal spray (4: 1 to 4).

EN 12477

EN 12477:
Protective gloves for welders.

This standard specifies the requirements and test methods applicable to protective gloves used for welding and manual metal cutting as well as associated techniques. The gloves protect the hands and wrists during welding and associated tasks. They protect from minor molten metal spray, short exposure to a limited flame, convective heat, contact heat and UV radiation emitted by arc welding. They also protect from mechanical aggressions. The gloves are split into 2 categories:

- Type A:** low dexterity with higher performances for strong welding.
- Type B:** higher dexterity with lower performances for detailed welding.

EN 511:
Protective gloves against cold
This standard defines the requirements and test methods for gloves that protect from convective or conducted cold up to -50°C . This cold can be due to climatic conditions or an industrial activity.

- A:** Convective cold: (Level 0 to 4).
- B:** Contact cold (Level 0 to 4).
- C:** Watertightness [Level 0 = non-watertight glove or 1 = watertight glove].

EN13594

EN 13594:
Protective gloves for bikers.

The standard applies to protective gloves used when riding motorcycles on roads. It indicates requirements in terms of size, ergonomics, harmlessness, mechanical properties, shock protection, marking and user information. As the wearing of certified gloves has been mandatory in France since 2016, this standard is used to assess motorcycling glove protection levels.

- **Level 1:** Protection of the hands from abrasion for 4s.
- **Level 1 KP:** Protection of the hands from abrasion for 4s and protection of the joints (Shock resistance).
- **Level 2 KP:** The highest level. Protection of the hands from abrasion for 8s and protection of the joints (Shock resistance).

EN659:2003

+A1 2008

EN 659:
Protective gloves for fire-fighters.

The standard indicates the minimum performance requirements and the test methods required for fire-fighter protective gloves. Specific fire-fighter gloves can allow them to work for extended periods in hazardous conditions.

The standard defines:

- Size and dexterity requirements
- Minimum mechanical and thermal resistance
- Seam strengths
- Requirements on the difficulty in removing the gloves
- Heat shrinking requirements
- Solidity requirements
- Requirements on resistance to the penetration of liquid chemicals

The standard also optionally defines levels of resistance to water penetration of materials.

ISO15383:2001

ISO 15383:
Protective gloves for fire-fighters.

This standard defines 3 types of glove with different performance requirements.

- Gloves of **type 1** correspond to the lowest performance level: the criteria considered suitable for fires in natural spaces.
- Gloves of **type 2** correspond to the intermediate level, the requirements are partly based on EN 659.
- Gloves of **type 3** correspondent to the highest level, the requirements are partly based on the NFPA 1971 standard.

+ information on the standards on rostaing.com/normes

Every PPE supplier is bound to make the glove's **Declaration of conformity** available to you. To get it, **download it from our website**

AN ECONOMIC GESTURE FOR THE PLANET

GLOVE CARE:

Our gloves are designed **to last**. To achieve that, they are all washable in warm water and soap and dry away from any heat source. Leather gloves can always be nourished with a little moisturising cream or clear polish.

ONLY REPLACE 1 OUT OF 2 GLOVES!

Gloves that feature this symbol are gloves for which it is possible to buy only one of the gloves, left or right, instead of the pair. Indeed, sometimes wear is only on one hand. Result: **less waste and more savings!**

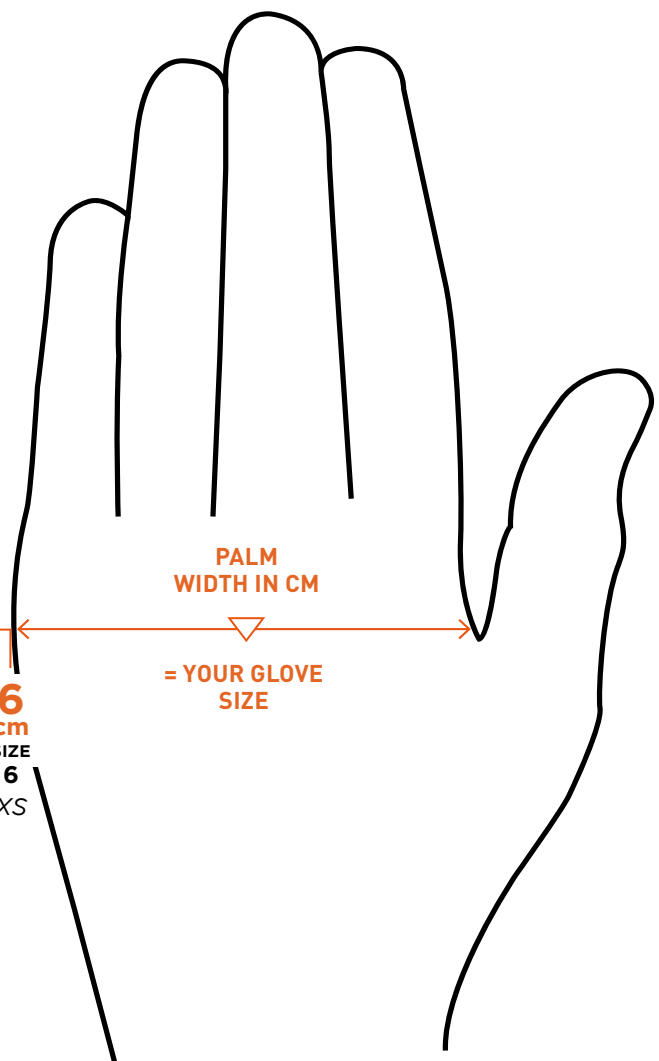

SIZE GUIDE

Wearing gloves that are the wrong size and not suitable for the task at hand **reduces hand sensitivity and dexterity**. To maintain the glove's performance and protection levels, it is **important** that your glove **is the right size**. **If your size is between 2 sizes**, we recommend the **larger size**.

Choose the glove size for your hands.

TO FIND OUT YOUR SIZE, PLACE YOUR LEFT HAND ON THE DIAGRAM

PLANTING

B SEQUOIA: Planting, digging and weeding

- VALIDATED BY LANDSCAPERS
- WATER REPELLENT AND BREATHABLE BACK
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

EVO13: Planting, digging, weeding

- SCOTCHGUARD TREATED WATER REPELLENT LEATHER
- FREEDOM OF MOVEMENT
- GRIP IN WET ENVIRONMENTS

SIZES: 7 TO 12
COMPOSITION:
 Grain leather, polyester Ripstop

SIZES: 6 TO 11
COMPOSITION:
 Goat leather, Skinsoft

B BASIC: Planting, digging, weeding

- GOOD GRIP
- PALM AND FINGER PROTECTION

SIZES: 6 TO 10
COMPOSITION:
 Latex, polycotton

DEVELOPMENT OF INNOVATING TECHNOLOGICAL MATERIALS

RIPSTOP: a non-tear fabric weave, composed of 3 layers:

- 1 RIPSTOP non-scratch
- 2 Waterproof-breathable membrane
- 3 Comfortable velvet lining

SKINSOFT: synthetic material with properties close to leather (appearance, flexibility, strength, oil repellent properties) composed of 2 layers:

- 1 Polymer coating
- 2 Comfortable velvet lining

PLANTING

PRUNING

B ROSERAIE: Thorny plant maintenance

- VALIDATED BY ROSE-GROWERS
- FOREARM PROTECTION FROM THORNS
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

B EM25A: Garden maintenance

- FULL SUPPLE LEATHER PROTECTION
- GOOD HAND BREATHABILITY
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

SIZES: 7 TO 10
COMPOSITION:
 Goat leather, Skinsoft

SIZES: 7 TO 10
COMPOSITION:
 Metis grain

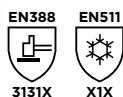

B SARMENT: Intensive pruning, root removal, bundling

- 3 X MORE DURABLE: ERGONOMIC REINFORCEMENTS ON WEAR AREAS
- GOOD SHEAR HANDLING
- IDEAL FOR COLD AND WET ENVIRONMENTS (UP TO 0°C)

NEW

SIZES: 8 TO 11
COMPOSITION:
 Acrylic, nitrile, polyamide, para-aramid

CLEAR BRUSH

B RONCIER: Brush clearance, pruning of large thorny plants (Pyracantha)

- THE THICK LEATHER PROTECTS FROM LARGE THORNS
- BARRIER TO OILS AND KEEPS A GOOD GRIP
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

B OPTIPRO: Garden maintenance and brush clearance

- SUITABLE FOR LOW VIBRATION TOOLS
- NON-SLIP FINGERTIPS
- CLOSURE ADJUSTABLE AT THE WRIST

SIZES: 7 TO 11
COMPOSITION:
 Cow split leather, polyester Ripstop, Skinsoft

SIZES: 8 TO 10
COMPOSITION:
 Polyester, polyester microfibre

2016/425 - MINOR RISKS

B GRIFSTOP: Brush clearance and branch cutting

- SCRATCH RESISTANCE
- BREATHABLE-LEAK TIGHT FOR MORE COMFORT
- UNIVERSAL: FITS EVERY ARMS

B T.70X135: Brush clearance and branch cutting

- HIGH THORN RESISTANCE
- COMPLETE LEG COVERING

SINGLE SIZE
COMPOSITION:
 Polyester Ripstop

2016/425 - MINOR RISKS

SINGLE SIZE
COMPOSITION:
 Cow split leather

2016/425 - MINOR RISKS

WORK

B DURANIT-ONE: Handling and machinery operation

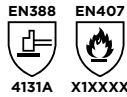

- 3X MORE DURABLE: REINFORCEMENT OF THE 1ST WEAR ZONE
- GRIP IN OILY CONDITIONS
- SECOND SKIN EFFECT

SIZES: 6 TO 12

COMPOSITION:

Nitrile, polyamide, elasthane

B MIDSEASON: Mid-season work and pruning

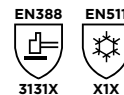

- 3X MORE DURABLE: REINFORCEMENT OF THE 1ST WEAR ZONE
- PLEASANT SKIN CONTACT
- IDEAL FOR COLD AND WET ENVIRONMENTS (UP TO 0°C)

SIZES: 7 TO 12

COMPOSITION:

Nitrile, acrylic

B MACPRO: Outdoor masonry and earthworks

- VALIDATED BY MASONS
- EXCELLENT TOOL GRIP
- CLOSURE ADJUSTABLE AT THE WRIST

SIZES: 8 TO 11

COMPOSITION:

Latex, high tenacity polyethylene, mineral fibres

B WINTERPRO: Heavy work - cold and wet environments

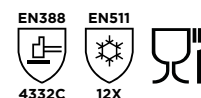

- WITHSTANDS COLD UP TO -10°C
- FULL HAND PROTECTION
- GOOD TOOL GRIP

SIZES: 7 TO 11

COMPOSITION:

Nitrile, acrylic

WORK

B STRONGER: Major abrasive and cutting works

- VERY GOOD CUT RESISTANCE
- INCREASED LIFE SPAN THANKS TO THE PALM REINFORCEMENT
- MAINTAINS A GOOD GRIP IN WET OR OILY ENVIRONMENTS

B CLOTURE: Barbed wire handling

- VALIDATED BY FARMERS
- VERY GOOD PERFORATION RESISTANCE
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

SIZES: 8 TO 11

COMPOSITION:

Cow split leather, polyurethane, high tenacity polyethylene, mineral fibres, polyamide

SIZES: 8 TO 11

COMPOSITION:

Grain leather, polyester Ripstop

B SOLIDO: Timber, rock and plant handling

- VERY PERFORATION RESISTANT
- WATER REPELLENT AND BREATHABLE BACK
- COMFORT LINING

SIZES: 8 TO 11

COMPOSITION:

Cow split leather, polyester Ripstop, polyamide

SORTING & RECYCLING

RIPEUR/CO: Waste collection and sorting

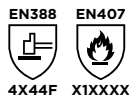

- MAXIMUM CUT RESISTANCE (61.4 N)
- VERY GOOD PERFORATION RESISTANCE
- BARRIER TO OILS AND KEEPS A GOOD GRIP

SIZES: 7 TO 12

COMPOSITION:

Cow split leather, stainless steel, high tenacity polyethylene, polyamide

BLACKNIT: Waste management, sorting and recycling

- MAXIMUM CUT RESISTANCE (33.6 N)
- SUITABLE FOR OILY ENVIRONMENTS
- SOBER BLACK COLOUR, STAIN RESISTANT

SIZES: 7 TO 11

COMPOSITION:

Nitrile, high tenacity polyethylene, mineral fibres

WETCUT03-EVOLUTION: Waste collection

- VERY GOOD CUT RESISTANCE
- GRIP IN WET ENVIRONMENTS
- DIRT STAYS ON THE OUTSIDE: ADJUSTABLE WRIST TIGHTENING

SIZES: 7 TO 12

COMPOSITION:

Grain leather, Skinsoft, mineral fibres, polyamide, polyester

MASTERTOP: Waste sorting and processing

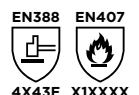

- VERY GOOD CUT RESISTANCE (25 N)
- GRIP IN OILY CONDITIONS
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 7 TO 12

COMPOSITION:

Cow split leather, polyamide, high tenacity polyethylene, mineral fibres

SORTING & RECYCLING

DRAINAGE

B LIQUIDO: High pressure cleaning

- GOOD GRIP
- SUITABLE FOR PEOPLE WITH LATEX ALLERGIES
- FOREARM PROTECTION (35 CM)

SIZES: 7 TO 10
COMPOSITION:
Nitrile, polyester

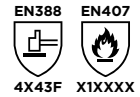

STOP-OILCUT: Piping, sewer inspection

- MAXIMUM CUT RESISTANCE (**40.7 N**)
- GRIP IN WET AND OILY ENVIRONMENTS
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 7 TO 11
COMPOSITION:
Nitrile, high tenacity polyethylene, polyester, stainless steel

B WETPRO: Pit, sewage cleaning

- PROTECTION EXTENDED UP TO THE SHOULDER (60 CM)
- ARM ADJUSTMENT USING A TIGHTENING ELASTIC
- GOOD GRIP

SIZES: 9 AND 10
COMPOSITION:
PVC, cotton

CARING

ANIMALYS1: Work with animals - bites

- BARRIER TO BITES AND SCRATCHES
- FULL AND EXTENDED ARM PROTECTION (58 CM)
- GOOD PERFORATION PROTECTION

SIZES: 8 TO 12

COMPOSITION:

Cow grain leather, para-aramid

2016/425 MINOR RISKS

*Certification pending for information

EN388

2323X

B RONCIER: Work with animals - scratches

- PROTECTION FROM SCRATCHES AND SMALL TEETH
- GRIP MAINTAINED IN GREASY ENVIRONMENTS
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

SIZES: 7 TO 11

COMPOSITION:

Cow split leather, polyester Ripstop, Skinsoft

INTERVENE

OPSB+* / OPSK+** : Weapons handling

- MAXIMUM CUT RESISTANCE (32.1 N)
- STANDARDISED SHOCK PROTECTION ON SENSITIVE ZONES
- TRIGGER FINGER DEXTERITY

SIZES: 6 TO 11

COMPOSITION:

High tenacity polyethylene, polyurethane, D30®, silicone amara, thermoplastic

EN388

OPSB* / OPSK** : Weapons handling

- MAXIMUM CUT RESISTANCE (32.1 N)
- OPTIMUM GRIP FROM THE SILICONE
- TRIGGER FINGER DEXTERITY

SIZES: 6 TO 11

COMPOSITION:

High tenacity polyethylene, polyurethane, D30®, silicone amara

EN388

GP-INTER: Interventions and arrests

- MODEL APPROVED BY THE FRENCH MINISTRY OF THE INTERIOR
- GOOD CUT RESISTANCE
- WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

SIZES: 6 TO 11

COMPOSITION:

Goat leather, cotton, mineral fibres, para-aramid, high tenacity polyethylene

EN388

M0456: Security operations - security and military

- D30® STANDARD SHOCK PROTECTION
- OPTIMUM GRIP FROM THE SILICONE
- FIRE TREATMENT

SIZES: 7 TO 11

COMPOSITION:

Goat leather, aramid, D30®

EN388

EN407

INTERVENE

SPEEDER1KP: Motorcycling and interventions

- MOTORCYCLE STANDARDS
- EXCELLENT HANDLEBAR GRIP
- FLEXIBLE D30® PROTECTION SHELLS

SIZES: 6 TO 12

COMPOSITION:

Goat leather, silicone amara, polyester, D30®

MONTAGNE: Control operations - cold environments

- WITHSTANDS COLD UP TO -20°C
- LEASH TO AVOID LOSING THE GLOVE
- EXCELLENT GRIP

SIZES: 6 TO 12

COMPOSITION:

Goat leather, impercore fabric, amara silicone coated studs, polyester fur

2016/425 MINOR RISKS

SAP: FAST-ROPE descent operations

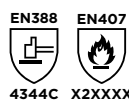

- USE OF ALL ROPES IN EXTREME SITUATIONS
- HEAT RESISTANT
- VERY ABRASION AND PERFORATION RESISTANT

SIZES: 7 TO 11

COMPOSITION:

Goat leather, polyurethane laminated polyamide fabric, cow split leather, para-aramid

CLIFF: Abseiling operations

- SUITABLE FOR ROPE USE
- REINFORCEMENT ON THE WEAR ZONE
- VERY ABRASION AND PERFORATION RESISTANT

SIZES: 8 TO 11

COMPOSITION:

Cow split leather, foamback, goat leather, polyester

2016/425 MINOR RISKS

SECURE

B DURANIT-ONE: Installation of temporary security barriers

- 3X MORE DURABLE: REINFORCEMENT OF THE 1ST WEAR ZONE
- SECOND SKIN EFFECT
- GRIP IN OILY CONDITIONS

SIZES: 6 TO 12

COMPOSITION:

Nitrile, polyamide, elastane

PROTECT4SHOCK: Dog handler

- PROTECTION FROM LEAD MOVEMENT: D30® REINFORCEMENT
- OPTIMISED DEXTERITY

SIZES: 7 TO 10

COMPOSITION:

Metis leather, polyester, D30®

2016/425 MINOR RISKS

RIPDEXG: Perimeter security - barbed wire installation: Concertina barbed wire, razor wire

- MAXIMUM CUT RESISTANCE (**62 N**)
- VERY GOOD PERFORATION RESISTANCE
- GRIP MAINTAINED IN WET AND OILY ENVIRONMENTS

SIZES: 7 TO 11

COMPOSITION:

Cow split leather, stainless steel, high tenacity polyethylene, polyamide

PUT OUT STRUCTURAL AND OUTDOOR FIRES

WASHING: A MAJOR CHALLENGE!

Your PPE can be contaminated by toxic gases and VOCs (volatile organic compounds) that can impact **fire-fighter health**.

Rostaing is committed by certifying its products after 1 wash and continues its policy by increasing the number of washes or the type of **decontamination** to guarantee your safety over time.

**LABEL
CIVIL SECURITY**

In 2020, Rostaing was the first supplier to obtain the Civil Protection Label delivered by the **FRENCH MINISTRY OF THE INTERIOR**. This qualification that defines the essential health and safety requirements to follow in matters of standards, European regulations and the Labour Code, guarantees you the best protection and technical performance. An absolute necessity that is a reflection of the demands we impose on ourselves to ever better protect those who risk their lives to protect us.

Flash the QR code to see **the label requirements**

TECHNOLOGY AIRSYSTEM[®] ROSTAING

AIRSYSTEM[®] is a new generation of aramide based technical textiles that have increased heat resistance. The perfect compromise between protection and comfort that can react to heat flows.

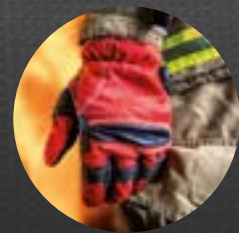

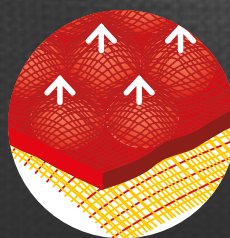

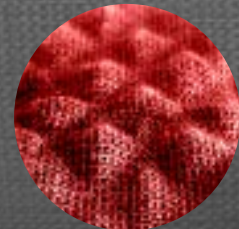

Air-bag effect

Thanks to its innovation and cutting edge technology, AIRSYSTEM[®] effectively protects the hands and forearms from **FLASH-OVER**.

The diamond-shaped cells swell at a very high temperature to create an **air layer** that provides an **additional thermal barrier**.

AIRSYSTEM[®]
ROSTAING

Improves the heat resistance technical performances of our products by 20%

VEHICLE EXTRICATION

RESCUEFITFLUO: Personal rescue and road rescue

- MAXIMUM CUT RESISTANCE (32.1 N)
- STANDARD SHOCK PROTECTION

SIZES: 6 TO 11

COMPOSITION: High tenacity polyethylene, mineral fibres, polyurethane, cow split leather, D30®, thermoplastic

RESCUEFLUOBC-SC: Personal rescue and road rescue

- MAXIMUM CUT RESISTANCE (32.1 N)
- STANDARD SHOCK PROTECTION
- GRIP IN WET AND OILY ENVIRONMENTS

SIZES: 6 TO 11

COMPOSITION: High tenacity polyethylene, mineral fibres, polyurethane, cow split leather, D30®, thermoplastic

RESCUEFLUO-SC: Personal rescue and road rescue

- MAXIMUM CUT RESISTANCE (32.1 N)
- STANDARD SHOCK PROTECTION
- WRIST ADJUSTMENT SYSTEM

SIZES: 6 TO 11

COMPOSITION: High tenacity polyethylene, mineral fibres, polyurethane, cow split leather, D30®, thermoplastic

BLACKSTICK+-SC: Personal rescue and road rescue

- MAXIMUM CUT RESISTANCE (32.1 N)
- GRIP IN WET AND OILY ENVIRONMENTS
- VERY GOOD PERFORATION RESISTANCE

SIZES: 7 TO 11

COMPOSITION: Cow split leather, polyurethane, high tenacity polyethylene, mineral fibres

FEELPRO: Machinery and gantry crane operators

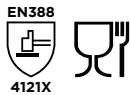

- ULTRA-COMFORTABLE, SECOND SKIN EFFECT
- EXCELLENT GRIP
- HIGH VISIBILITY

SIZES: 7 TO 11

COMPOSITION:

Nitrile, polyamide, elasthane

VIBRAPROTECT: Extraction - Pneumatic drill

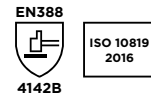

- VALIDATED BY PUBLIC WORKS PROFESSIONALS
- STANDARDISED VIBRATION ABSORPTION
- OPTIMISED ERGONOMICS FOR INTENSIVE WORK

SIZES: 8 TO 11

COMPOSITION:

Foamed latex, polyester, cotton

EPS25A: Operations technician

- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY
- FULL HAND PROTECTION

SIZES: 6 TO 11

COMPOSITION:

Goat leather

EXTRACT & PRODUCE

BACKPROTECT: Water - gas pipe-layer

- PROTECTS FROM HAND CRUSHING RISKS
- STANDARDISED SHOCK PROTECTION ON THE BACK OF THE HAND
- GOOD GRIP

SIZES: 8 TO 10

COMPOSITION:

Natural latex, polyamide, cotton

B MAXIPRO: Water - gas pipe-layer

- FULL HAND PROTECTION
- EXCELLENT TOOL GRIP

SIZES: 8 TO 11

COMPOSITION:

Nitrile, polyamide

STOP-OILCUT: Water - gas pipe-layer

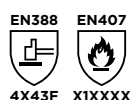

- MAXIMUM CUT RESISTANCE (40.7 N)
- GRIP IN OILY CONDITIONS
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 7 TO 11

COMPOSITION:

Nitrile, high tenacity polyethylene, polyester, stainless steel

B WETPRO: Water - gas pipe-layer

- PROTECTION EXTENDED UP TO THE SHOULDER (60 CM)
- ARM ADJUSTMENT USING A TIGHTENING ELASTIC
- GOOD GRIP

SIZES: 9 AND 10

COMPOSITION:

PVC, cotton

EXTRACT & PRODUCE

CRIIBC: Cryogenic gas handling

- PROTECTS FROM CRYOGENIC COLD (-196°C)
- WRIST PROTECTION WITH VEIN PATCH
- LEATHER THAT DOES NOT HARDEN ONCE DRY

SIZES: 8 TO 11

COMPOSITION:

Cow grain leather, wool, cotton

CRIO: Cryogenic gas handling

- PROTECTS FROM CRYOGENIC COLD (-196°C)
- EXTENDED FOREARM PROTECTION
- LEATHER THAT DOES NOT HARDEN ONCE DRY

SIZES: 8 TO 11

COMPOSITION:

Cow grain leather, wool, cotton

SIZES: 8 TO 12
COMPOSITION:
 Silicone, para-aramid, acrylic, cotton

PROCESS

OILGRIP5: Rolling

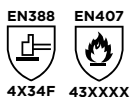

- WITHSTANDS FLAMES AND CONTACT HEAT UP TO 350°C
- MAXIMUM CUT RESISTANCE (42 N)
- GRIP MAINTAINED IN GREASY ENVIRONMENTS

SIZES: 8 TO 11

COMPOSITION:

Para-aramid, cow split leather, silicone, cotton, mineral fibres

ROLLHEAT: Rolling

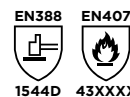

- WITHSTANDS CONTACT HEAT UP TO 350°C
- VERY GOOD CUT RESISTANCE
- BARRIER TO OILS AND KEEPS A GOOD GRIP

SIZES: 7 TO 11

COMPOSITION:

Para-aramid terry loop, cotton

HYDROPRO: Rolling

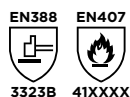

- WITHSTANDS CONTACT HEAT UP TO 100°C
- GOOD CUT RESISTANCE
- THE WATERPROOFED LEATHER DOES NOT HARDEN ONCE DRY

SIZES: 8 TO 11

COMPOSITION:

Cow grain leather, para-aramid

PROCESS

METALSTRONG+: Stamping

- MAXIMUM CUT RESISTANCE (51.8 N)
- GRIP IN OILY CONDITIONS
- FULL HAND BACK PROTECTION

SIZES: 7 TO 11

COMPOSITION:

Cow split leather, cotton, stainless steel, high tenacity polyethylene, polyamide

METALSTRONG: Stamping

- MAXIMUM CUT RESISTANCE (51.8 N)
- GRIP IN OILY CONDITIONS

SIZES: 7 TO 11

COMPOSITION:

Cow split leather, cotton, stainless steel, high tenacity polyethylene, polyamide

MASTERTOP: Stamping

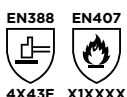

- VERY GOOD CUT RESISTANCE (25 N)
- GRIP IN OILY CONDITIONS
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 7 TO 12

COMPOSITION:

Cow split leather, polyamide, high tenacity polyethylene, mineral fibres

BLACKTOP: Stamping

- MAXIMUM CUT RESISTANCE (32.1 N)
- GRIP IN OILY CONDITIONS
- VERY GOOD PERFORATION RESISTANCE

SIZES: 7 TO 11

COMPOSITION:

Cow split leather, polyurethane, high tenacity polyethylene, mineral fibres

PROCESS

ERGOMASTER: Stamping

- VERY GOOD CUT RESISTANCE (29.3 N)
- MOVEMENT FACILITATED BY THE KNIT ERGONOMICS

SIZES: 35 cm, 45 cm (with or without hook and loop), 60 cm (with hook and loop)

COMPOSITION:

Polyamide, high tenacity polyethylene, mineral fibres

ERGOPRIMA: Stamping

- VERY GOOD CUT RESISTANCE
- MOVEMENT FACILITATED BY THE KNIT ERGONOMICS
- HIGH VISIBILITY ORANGE COLOUR

SIZES: 35 cm, 45 cm (with or without hook and loop), 60 cm (with hook and loop)

COMPOSITION:

Polyamide, polyester, mineral fibres

PRIMACUFF: Stamping

- VERY GOOD CUT RESISTANCE
- AMBIDEXTROUS: DOUBLE SERVICE LIFE

SIZES: 35 cm, 45 cm (with or without hook and loop), 50 cm (with hook and loop), 60 cm (with hook and loop)

COMPOSITION:

Polyamide, polyester, mineral fibres

PROCESS

TABMASTER: Stamping

- VERY GOOD CUT RESISTANCE
- ADJUSTABLE TIGHTENING STRAP

SINGLE SIZE

2016/425 MINOR RISKS

COMPOSITION:

Polyamide, high tenacity polyethylene, mineral fibres

TABMASTER+: Stamping

- VERY GOOD CUT RESISTANCE
- ADJUSTABLE TIGHTENING STRAP
- REINFORCED PROTECTION ON 1ST WEAR ZONE

SINGLE SIZE

2016/425 MINOR RISKS

COMPOSITION:

Cow split leather, polyamide, high tenacity polyethylene, mineral fibres

MASTERTSHIRT: Stamping

- PRACTICAL: 2 IN 1
- REINFORCED PROTECTION

SIZES: M TO XXL

2016/425 MINOR RISKS

COMPOSITION:

Cotton, high tenacity polyethylene, mineral fibres

PROCESS & ASSEMBLE

B SPLITWELD: Welding and sheet metal work

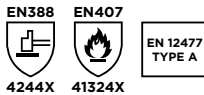

- WELDER STANDARD
- SUITABLE FOR WELD MAINTENANCE AND REPAIRS
- THE WATERPROOF LEATHER DOES NOT HARDEN ONCE DRY

PROSOUD/1: Welding and sheet metal work

- WELDER STANDARD
- VERY GOOD CUT RESISTANCE (24.9 N)
- RESISTANCE TO MOLTEN METAL SPRAY

SIZES: 7 TO 11
COMPOSITION:
Cow split leather

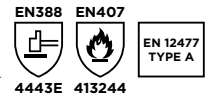

TOP SALES

SIZES: 6 TO 12
COMPOSITION:

Cow split leather, para-aramid, mineral fibres, cotton, polyester

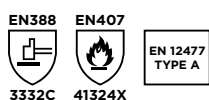

LIGHT-WELD: Welding and brazing

- WELDER STANDARD
- SUITABLE TO GRIP WELDING-BRAZING RODS
- GOOD CUT RESISTANCE

SIZES: 7 TO 11
COMPOSITION:

Goat leather, para-aramid, mineral fibres, cotton

PROCESS & ASSEMBLE

STOP-OILCUT: Machining

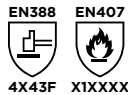

- MAXIMUM CUT RESISTANCE (40.7 N)
- GRIP MAINTAINED IN GREASY ENVIRONMENTS
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 7 TO 11

COMPOSITION:

Nitrile, high tenacity polyethylene, polyester, stainless steel

BLACKNIT: Machining

- MAXIMUM CUT RESISTANCE (33.6 N)
- SUITABLE FOR OILY ENVIRONMENTS
- SOBER BLACK COLOUR, STAIN RESISTANT

SIZES: 7 TO 11

COMPOSITION:

Nitrile, high tenacity polyethylene, mineral fibres

FIT4PROTOUCH: Antistatic operations - ATEX zones

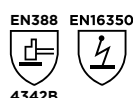

- SMALL CUT RESISTANCE
- ELECTROSTATIC PROTECTION
- HIGH VISIBILITY

SIZES: 6 TO 11

COMPOSITION:

Polyurethane, high tenacity polyethylene, carbon

ANTISTATIC

In some atmospheric conditions, objects and people have an electrostatic charge which results from the accumulation of electric charges and can cause electrification phenomena.

To be antistatic, a fabric must discharge quickly and not accumulate charges.

Our FIT4PROTOUCH reference meets the requirements of the **EN 16350** standard specific to protective gloves with electrostatic properties. **Therefore the FIT4PROTOUCH can be worn in electrostatic and ATEX (ATmosphere Explosive) zones.**

ASSEMBLE

BLACKTACTIL: Rebars and rivets

- MAXIMUM CUT RESISTANCE (32.1 N)
- SECOND SKIN EFFECT
- COLOUR ADAPTED TO THE USE

SIZES: 6 TO 12

COMPOSITION:

Polyurethane, high tenacity polyethylene, mineral fibres

STICKFLEX: Rebars

- MAXIMUM CUT RESISTANCE (32.1 N)
- GRIP IN OILY CONDITIONS
- VERY GOOD PERFORATION RESISTANCE

SIZES: 7 TO 11

COMPOSITION:

Goat leather, high tenacity polyethylene, mineral fibres

TAKECARE: Rebars

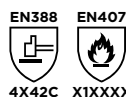

- GOOD CUT RESISTANCE
- DURABILITY STRENGTHENED BY 50%
- WITHSTANDS CONTACT HEAT UP TO 100°C

SIZES: 6 TO 11

COMPOSITION:

Polyurethane, high tenacity polyethylene, polyamide, elastane

DURANIT-ULTRA: Adjuster fitter

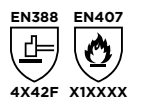

- MAXIMUM CUT RESISTANCE (40.4 N)
- SECOND SKIN EFFECT
- GRIP IN OILY CONDITIONS

SIZES: 6 TO 12

COMPOSITION:

Nitrile, high tenacity polyethylene, mineral fibres, stainless steel, polyamide, elastane

ASSEMBLE

PROTECT4SHOCK: Intensive clipping

- CAN BE USED AS A CLIPPING HAND TOOL (D30®)
- OPTIMISED DEXTERITY

SIZES: 7 TO 10

2016/425 MINOR RISKS

COMPOSITION:

Metis leather, polyester, D30®

OPSB+: Occasional clipping

- MAXIMUM CUT RESISTANCE (32.1 N)
- STANDARDISED SHOCK PROTECTION ON SENSITIVE ZONES
- OPTIMUM GRIP

SIZES: 6 TO 11

COMPOSITION:

High tenacity polyethylene, polyurethane, D30®, silicone amara, thermoplastic

EN388

4X42FP

DURANIT-ONE: Assembly operations

- 3X MORE DURABLE: REINFORCEMENT OF THE 1ST WEAR ZONE
- SECOND SKIN EFFECT
- SUITABLE FOR OILY ENVIRONMENTS

SIZES: 6 TO 12

COMPOSITION:

Nitrile, polyamide, elasthane

EN388

4131A

EN407

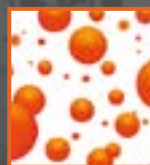

X1XXXX

TECHNOLOGY

D30®

Built into the palms or backs of gloves, smart D30® foam helps **protect your hands** subjected to shocks or high energy on impact.

HOW DOES IT WORK?

Supple and flexible material

Absorbs and dissipates impact energy

Return to the flexible state

HANDLE

B BLACKTACTIL: Cutting handling

- SECOND SKIN EFFECT
- COLOUR ADAPTED TO THE USE

SIZES: 6 TO 12

COMPOSITION:

Polyurethane, high tenacity polyethylene, mineral fibres

EN388

4X42F

BLACKTACTIL/0: Handling - removal from the press

- VERY GOOD CUT RESISTANCE (28.2 N)
- SECOND SKIN EFFECT
- COLOUR ADAPTED TO THE USE

SIZES: 6 TO 11

COMPOSITION:

High tenacity polyethylene, mineral fibres

EN388

3X4XE

BLACKTOPNIT: Invar handling

- MAXIMUM CUT RESISTANCE (32.1 N)
- GRIP IN OILY CONDITIONS
- LEAVES NO MARKS

SIZES: 7 TO 11

COMPOSITION:

Nitrile, high tenacity polyethylene, mineral fibres

EN388

4X43F

HANDLE

WETCUT01-EVOLUTION: Handling and assembly

- SMALL CUT RESISTANCE
- GRIP IN WET ENVIRONMENTS
- DIRT STAYS ON THE OUTSIDE: ADJUSTABLE WRIST TIGHTENING

SIZES: 7 TO 12

COMPOSITION:

Grain leather, Skinsoft, high tenacity polyethylene, polyamide, polyester

WETCUT03-EVOLUTION: Handling and assembly

- VERY GOOD CUT RESISTANCE
- GRIP IN WET ENVIRONMENTS
- DIRT STAYS ON THE OUTSIDE: ADJUSTABLE WRIST TIGHTENING

SIZES: 7 TO 12

COMPOSITION:

Grain leather, Skinsoft, mineral fibres, polyamide, polyester

WETCUT03M-EVO: Handling and assembly

- VERY GOOD CUT RESISTANCE
- GRIP IN WET ENVIRONMENTS
- EXTENDED WRIST PROTECTION

SIZES: 7 TO 12

COMPOSITION:

Grain leather, Skinsoft, high tenacity polyethylene, polyamide, polyester

WETCUT05-EVOLUTION: Handling and assembly

- MAXIMUM CUT RESISTANCE (31.4 N)
- GRIP IN WET ENVIRONMENTS
- DIRT STAYS ON THE OUTSIDE: ADJUSTABLE WRIST TIGHTENING

SIZES: 7 TO 12

COMPOSITION:

Grain leather, Skinsoft, mineral fibres, high tenacity polyethylene, polyamide, polyester

CONTROL

SPEEDNET: Paint handling and surface cleaning

- LEAVES SURFACES CLEAN AND FREE OF MARKS
- DOES NOT FLUFF
- IMPROVED PERFORMANCES AFTER WASHING

TN27NS: Clean room operations

- DOES NOT FLUFF
- ECO-DESIGNED

TOP SALES

SIZES: 6 TO 11

COMPOSITION:
Microfibre

SIZES: 6 TO 10

COMPOSITION:
Polyamide

CONTROL

B SKINPRO: Maintenance operations

- ULTRA LIGHTWEIGHT
- BETTER ALTERNATIVE TO DISPOSABLE GLOVES

SIZES: 7 TO 11
COMPOSITION:
 Polyurethane, polyester

B CANADA: Maintenance operations

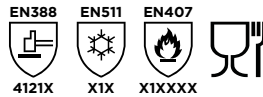

- GOOD GRIP
- IDEAL FOR COLD AND WET ENVIRONMENTS UP TO 0°C
- EXTREMELY SOFT ON THE SKIN

TOP SALES

SIZES: 6 TO 11
COMPOSITION:
 Nitrile, acrylic

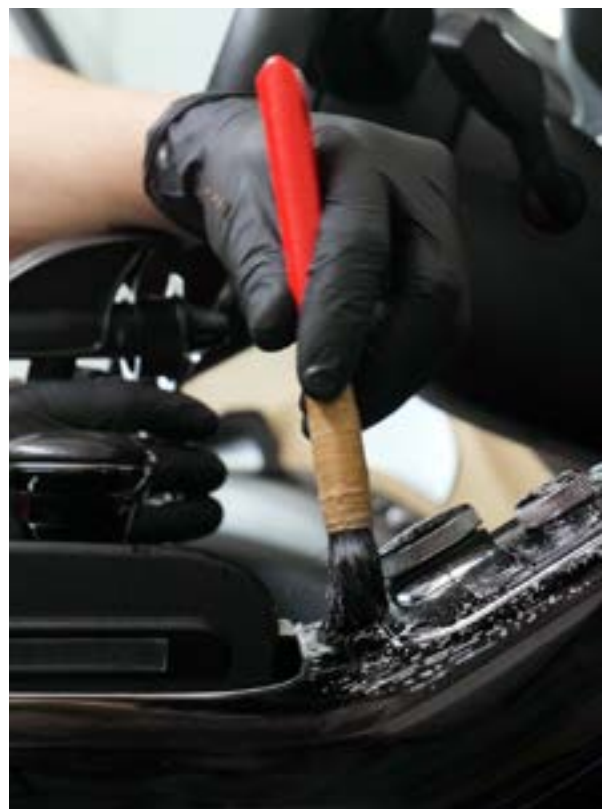

B MECANO: Drainage operations

- AMBIDEXTROUS

EXTRACT

FEELPRO: Machinery operator

- ULTRA-COMFORTABLE, SECOND SKIN EFFECT
- EXCELLENT GRIP
- HIGH VISIBILITY

SIZES: 7 TO 11
COMPOSITION:
 Nitrile, polyamide, elasthane

MAXIPRO: Machinery operator in wet weather

- FULL HAND PROTECTION
- EXCELLENT GRIP
- WATER AND GREASE RESISTANT

SIZES: 8 TO 11
COMPOSITION:
 Nitrile, polyamide

CANADA: Machinery operator in wet weather and cold weather (up to 0°C)

- GOOD GRIP
- EXTREMELY SOFT ON THE SKIN

SIZES: 6 TO 11
COMPOSITION:
 Nitrile, acrylic

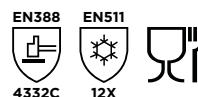

WINTERPRO: Machinery operator in cold and wet weather (up to -10°C)

- FULL HAND PROTECTION
- GOOD TOOL GRIP

SIZES: 7 TO 11
COMPOSITION:
 Nitrile, acrylic

DEMOLISH

RESCUEPRO: Heavy load handling

- MAXIMUM RESISTANCE TO MECHANICAL RISKS
- STANDARD SHOCK PROTECTION
- LOOP TO EASILY HANG AND FIT THE GLOVES

TAKECARE: Heavy load handling - screening

- GOOD CUT RESISTANCE
- DURABILITY STRENGTHENED BY 50%
- WITHSTANDS CONTACT HEAT UP TO 100°C

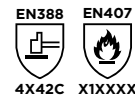

SIZES: 8 TO 11

COMPOSITION: High tenacity polyethylene, mineral fibres, polyurethane, cow split leather, D30®, thermoplastic

SIZES: 6 TO 11

COMPOSITION: Polyurethane, high tenacity polyethylene, polyamide, elasthane

BACKPROTECT: Quarries and large object transport

- PROTECTS FROM HAND CRUSHING RISKS
- STANDARDISED SHOCK PROTECTION ON THE BACK OF THE HAND
- GOOD GRIP

VIBRAPROTECT: Use of vibration devices, perforators, pneumatic drills

- VALIDATED BY PUBLIC WORKS PROFESSIONALS
- STANDARDISED VIBRATION ABSORPTION
- OPTIMISED ERGONOMICS FOR INTENSIVE WORK

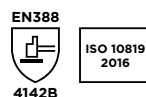

SIZES: 8 TO 10

COMPOSITION: Natural latex, polyamide, cotton

SIZES: 8 TO 11

COMPOSITION: Foamed latex, polyester, cotton

BUILD

B MACPRO: Masonry and cladding

- VALIDATED BY MASONS
- EXCELLENT TOOL GRIP
- CLOSURE ADJUSTABLE AT THE WRIST

SIZES: 8 TO 11

COMPOSITION:

Latex, high tenacity polyethylene, mineral fibres

B DURANIT-ONE: Handling operations

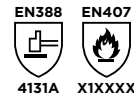

- 3X MORE DURABLE: REINFORCEMENT OF THE 1ST WEAR ZONE
- SECOND SKIN EFFECT
- SUITABLE FOR OILY ENVIRONMENTS

SIZES: 6 TO 12

COMPOSITION:

Nitrile, polyamide, elasthane

B DURANIT-ULTRA: Roofer

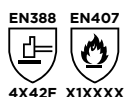

- MAXIMUM CUT RESISTANCE (40.4 N)
- SECOND SKIN EFFECT
- GRIP IN OILY CONDITIONS

SIZES: 6 TO 12

COMPOSITION:

Nitrile, high tenacity polyethylene, mineral fibres, stainless steel, polyamide, elasthane

BLACKSTICK+: Heavy and abrasive load handling

- MAXIMUM CUT RESISTANCE (32.1 N)
- GRIP IN OILY CONDITIONS
- VERY GOOD PERFORATION RESISTANCE

SIZES: 7 TO 11

COMPOSITION:

High tenacity polyethylene, polyurethane, cow split leather, mineral fibres

BUILD

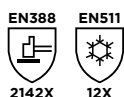

B COLDPRO: Stone-work in cold weather

- WITHSTANDS COLD UP TO -10°C
- EXCELLENT GRIP
- VISIBLE COLOUR

SIZES: 8 TO 11

NICE AND WARM FOR THE WELL-BEING OF ITS EMPLOYEES!

All the know-how **ROSTAING** for innovating **heated glove** technology! A solution for professionals: economic, ecological & societal.

ROSTAING GOES EVEN FURTHER WITH ITS ULTRA-EFFECTIVE HEATING TECHNOLOGY

- 1** **Everyone is different: Multifunction ON/OFF button** with several heating intensities available using the button located on the battery.
- 2** **Extremities are more vulnerable: An innovating heating patch** (created by Rostaing) for optimised heating of the most exposed zones.
- 3** **Savings and ecology are everybody's problem: Offset electronic system** and technical materials for longer service life.

SOCIETAL:
Taking care of employees means getting all the chances to: recruit them, keep them, involve them and value them.

ECOLOGICAL:
No electronics in the glove. It is offset in a module that includes the intelligence and the battery. Only replace what is worn.

ECONOMIC:
Invest in a comfortable and durable solution!
Only replace the gloves at the end of their service life.

**Cost effective solution: the intelligence can be deployed as a collective measure.*

Need to deploy a heated glove solution? Contact us: product@rostaing.fr

FRENCH MANUFACTURING ACCORDING TO ROSTAING

Eco-designed using high quality material scraps (leather, fabric, denim), our 100% French gloves are produced in our Villieu workshops. The eco-responsible approach means the use of “declassified” leather because too small for other leather industries (furnishing, clothing). It therefore reduces the amount of generated waste. By using our human resources and factories in France, the carbon footprint of these gloves made in France is minimised as is their impact on the environment.

OUR TOUCH LINE

The biggest glove market, non-wearers are the majority. Our duty: to convince people to protect their hands because **in France there is an accident involving the hands every 4 minutes.**

We investigated the reasons:

- "We can't feel what we're doing"
- "We take them off (to shake hands, use screens...)"
- "We sweat"

As a result, **we launched the Touch line in 2016** according to the following criteria:

- Thin and breathable materials (cooling thread, aerated coating...)
- A leash: to stop losing them or store them better
- The touch function to avoid taking them off

MID-SEASON WORK

E CANADA: Outdoor maintenance (0 to 15°C)

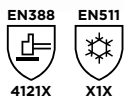

- GOOD GRIP
- LEASH LIKE SKIERS TO STOP LOSING GLOVES
- EXTREMELY SOFT ON THE SKIN

B MAXGRIP: All handling jobs, handle tools (0 to 15°C)

AN ADAPTED PRODUCT LINE

Our product lines are designed by listening to our customers and the feedback from specialist users.

how does it work?

1. ATTENTIVENESS

From factory production operators to policemen, to beginner gardeners, everyone's requirements and needs are collected and analysed.

2. DESIGN

The needs expressed by the users make it possible to target the most relevant technology to protect them and make it possible for them to have the best use.

3. FIELD TEST

A true test bench, this validation step is essential to validate the design of our most technical products. No glove gets past the design phase without having been tested by a representative panel of users.

4. ADVICE AND RECOMMENDATION

Our catalogue and materials make it possible to find the glove for your application. Our gloves are scored using a diagram that features the 4 main characteristics being sought.

Product scores are given for the **recommended use in the various universes**

For example:

A very durable glove to lay tiling is not durable when pruning thorn bushes or handling metal plates. It is therefore very important not to compare the diagrams for a same glove in different environments or applications.

5. FEEDBACK

Information is collected on various media: production sites, training centres, web sites, etc. Everything is closely looked at to make your feedback an enriched and shared experience.

You want to bear witness or take part in our continuous improvement?
You were not able to find the ideal glove?

Write to us: product@rostaing.fr

AN OFFER FOR EVERYONE!

We adapt our size ranges to our customer needs, uses and the identified population:

- From 3 years old to the biggest sizes
- 70% of our offer covers extreme sizes from 6 to 12
- A customisable range for the disabled

No one is immune to mistakes caused by loss of concentration, a defective machine or other factors beyond our control... Everyday we see hands that have suffered from everyday accidents. Rostaing creates bespoke products to allow the pursuit of a professional activity or a passion.

Contact: commercial@rostaing.fr

QUALITY AT THE HEART OF ALL OUR CHALLENGES!

Your hands are precious, as a result, effective and adapted protection is only valid if quality is provided. At Rostaing, our quality department works to continuously improve our products. Quality of materials, production, quality of the advice we give our users (the right glove for the right use and proper protection), these are our duties. Our integrated internal laboratory allows us to test our batches of raw materials to guarantee finished product quality.

If you have any remarks concerning the quality of our products or services: sav@rostaing.fr
We will get back to you within 24H.

WASHABLE GLOVE LINES!

We have chosen to offer ever more durable products that guarantee the same protection performances after several washing cycles. We propose assistance in setting up a professional care service. It has been proved! You will save 20 to 40% on your PPE budget and a 50% reduction of your waste.

Easy to set up, don't hesitate, **contact us:** commercial@rostaing.fr

THE BEST PROTECTION FOR EVERYONE!

Today, Rostaing is:

over 10,000 distributors and points of sale in France and abroad...
We are also on the web.

*Flash the QR code to see **our partner distributors and points of sale***

ZAMIS LINE

Seven glove model references and one apron reference to stock up your shelves, this very colourful line will attract the attention of parents and children, a guaranteed effect!

You will find the characteristics of all the models on pages 126 to 129.

Other promotional solutions with the wood display for children or the 32 peg totem are available on page 176.

WE LIKE:

- **The visible colourful line**
- **The adorable animal design**
- **The games on the back**
- **The gloves are attached and cannot be lost thanks to their leash, parents can relax!**

GARDEN LINE

Garden is the most trendy line in the garden! Created by the Chlorosphere trend firm, its flowery natural kraft packaging and its trendy coloured gloves in natural materials will delight users who are sensitive to design and the environment.

You will find the characteristics of all the models on pages 132 to 141.

Other promotional solutions with the matching face wood display or the 32 peg totem are available on page 176.

WE LIKE:

- **Natural trendy line**
- **Eco-responsible models**
- **The associated personality test**

THE TOUCH LINE

TOUCH line gloves were the most acclaimed in 2019! With their colourful look, their second skin comfort and their touch function, they offer adapted protection for all age ranges, uses and seasons.

You will find the characteristics of all the models on pages 142 to 147.

Other promotional solutions with the matching face wood display or the 32 peg totem are available on page 176.

WE LIKE:

- **A mixed line for the garden and/or DIY**
- **Leashes to avoid losing them**
- **References from size 5 (pre-teen) to size 12**

4 IN 1 LINE

New, the "4 in 1" gloves are coming. The concept is simple, one glove = 4 uses. If your customer is undecided, reassure them by proposing a multi-purpose "4 in 1" model.

You will find the characteristics of all the models on pages 148 to 153.

Other promotional solutions with the matching face wood display or the 32 peg totem are available on page 176.

WE LIKE:

- **A practical, simple and essential offer**
- **Different types of protection**
- **Their fun and playful packaging**

BATIPRO LINE

Initiated by the "CAPEB" and validated by construction sector professionals, this offer proposes gloves for all uses, from the most generic to the most specific.

See the characteristics of the models on the corresponding pages below.

Other promotional solutions with the matching face wood display or the 32 peg totem are available on page 176.

WE LIKE:

- **"Expert" gloves for specific professional uses**
- **The models that protect from the cold**
- **Their excellent value for money**

**French confederation of construction tradesmen and small companies*

Our 5 lines over 2 metres

*Simulation using our Rostaing planogramme tool. Ask your local sales representative for the tool.

Aisle dressing proposed by Rostaing is:

more simplicity and efficiency, everything is packaged in kit form.

more advice and sales by giving your customers the answers to their questions: hand size, use, protection standards.

more footfall in the aisles thanks to attractive visuals: two shelf stops of a design similar to the packaging for the corresponding product line will provide additional information and pleasant animation.

Your Rostaing expert is:

- *Your product expert who will provide training, advice and recommendations tailored to your customer base.*
- *Your sales expert: Business booster, it will propose themed offers throughout the year and transverse sales.*
- *Your service expert: they will know how to optimise space and will lay out your selection perfectly.*

Contact us for your store layout and boost your sales: commercial@rostaing.fr

■ **THE DURABLES: WOOD WITH NO NAILS OR SCREWS**

24 RACK DISPLAY UNIT

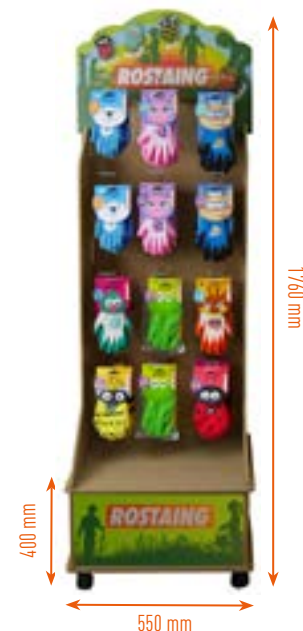

Ref: PRESBOISCORPATE-GARDEN or PRESBOISPRONATUR-TOUCH

Free of charge for all orders of at least 240 units.

Practical!
Our displays are all mounted on rollers

Built-in storage trays

12 RACK CHILDREN'S DISPLAY UNIT

Ref: CHILDREN'S DISPLAY UNIT

Free of charge for all orders of at least 100 units.

■ **THE TEMPORARIES: CARDBOARD**

**ADULT TOTEM
32 RACKS**

Ref: TOTEM32

Free of charge for all orders of at least 160 units.

**CHILDREN'S TOTEM
32 RACKS**

Ref: TOTEM/ENF

Free of charge for all orders of at least 80 units.

**OFFER TRAY
BULK SINGLE PRICE**

Ref: BACPROMO

Free of charge for all orders of at least 100 units.

Boost your sales!
Guaranteed +20%
cash register exits

**UNIVERSAL COUNTER
BOX 3 RACKS**

Ref: BOXCOMPTOIR

Free of charge for all orders of at least 60 units.

OUR DNA

80 years ago we committed ourselves to protecting the hands and lives of heavy industry workers. Today, our vocation is to protect all hands, in all universes from all risks.

The ROSTAING brand carries this mission through the commitment of its teams and **the passion of every employee**. We believe that a business is not just a workplace but also **somewhere we can feel useful and where it is important to share life values**.

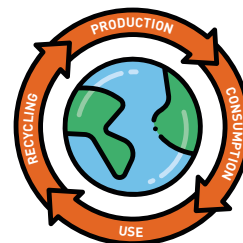

Our CSR policy reflects our values and defines the policies which make it possible for us **to limit our impacts on the environment and sustain our activity**:

Our signature of the **United Nations Global Compact** confirms all our societal commitments.

CONSUME BETTER BY PROTECTING NATURAL RESOURCES AND ENCOURAGING SHORT CIRCUITS:

- **Quality to last longer**
- **Washing recommendations to stop throwing away**
- **Closer production with 40% in the EUROMED zone**
- **The re-industrialisation project in France**
- **The choice of local suppliers**

DEVELOP STRONG COHESION TO ACHIEVE OUR OBJECTIVES:

Support the training and support that allows for personal development, team success and the growth of the ROSTAING group in its environment.

Communicate and act inside the ROSTAING Group sphere of influence to promote CSR commitments. The RFAR label shows the continuity of our commitment to the supplier relationship.

INNOVATE TO PROTECT EVERY HAND, PROTECT PEOPLE AND THEIR LIFE CONDITIONS:

- High technology process to prevent all risks beyond the standards.
More information on page 45.
- The integration of electronic systems to better protect us.
More information on page 36.
- The creation of a new Universe in 2022:
Caring for ourselves and others.

PROMOTE AND ENCOURAGE VOLUNTARY OR GENERAL INTEREST ACTIONS:

Donate for projects we care for and that have meaning. Every year, over 50,000 pairs of gloves are donated to non-profit organisations.

DO YOU NEED TO FIND OUT MORE ABOUT OUR PRODUCT LINES AND GLOVES?

And still,
it's more impressive down there...

A COMPLETE RANGE OF PROTECTION
FOR YOUR CLEARING OPERATIONS

AND STILL...

It is far from being the most
heat-sensitive place.

**HEAT
RANGE**

GLOVES TO PROTECT YOU
FROM 100°C TO 800°C
ROSTAING
NOTRE Avenir EN MAIN

Another new piercing Paul?

SCANFORCE
ROSTAING

METAL DETECTION
TECHNOLOGY USING DISCRETE VIBRATIONS

What is his new
job again ?

Caretaker in a new
amusement park why?

**GAMME RANGE
PERFORAZOR**

Complete protection designed
for concertina barbed
wire handling
